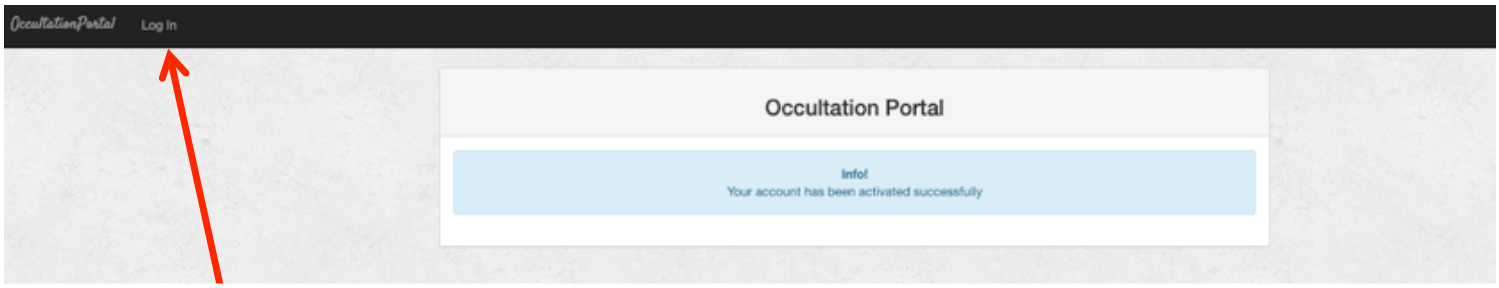
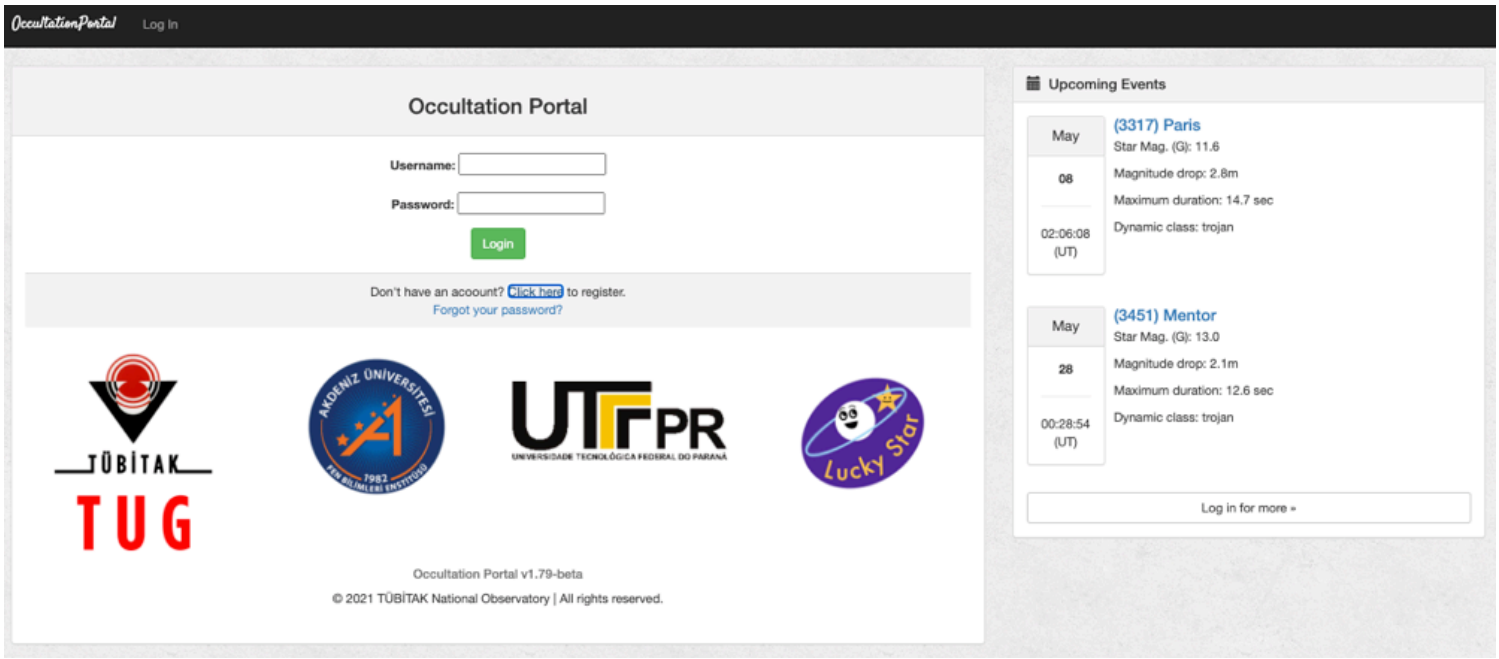
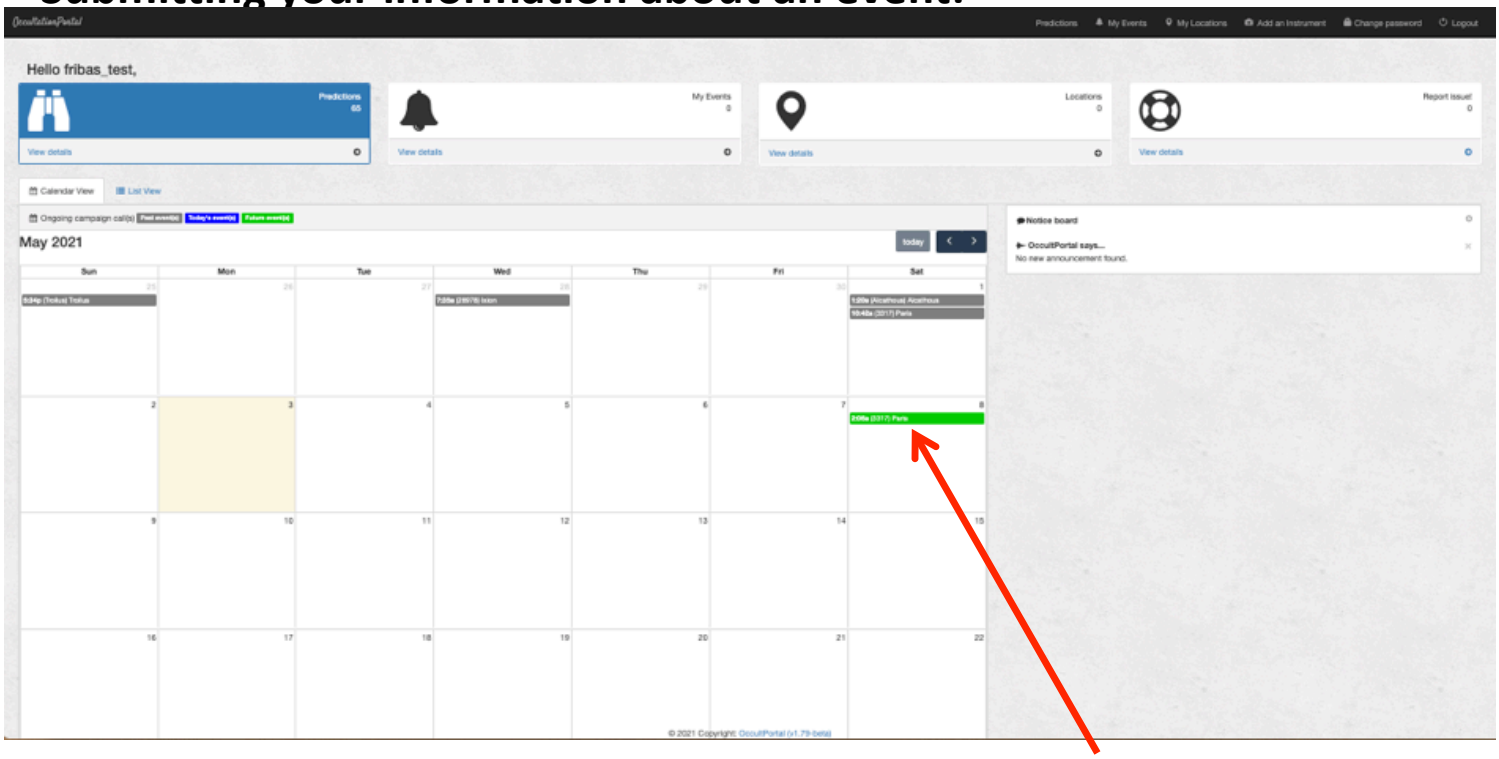
You will be sent to this confirmation page:



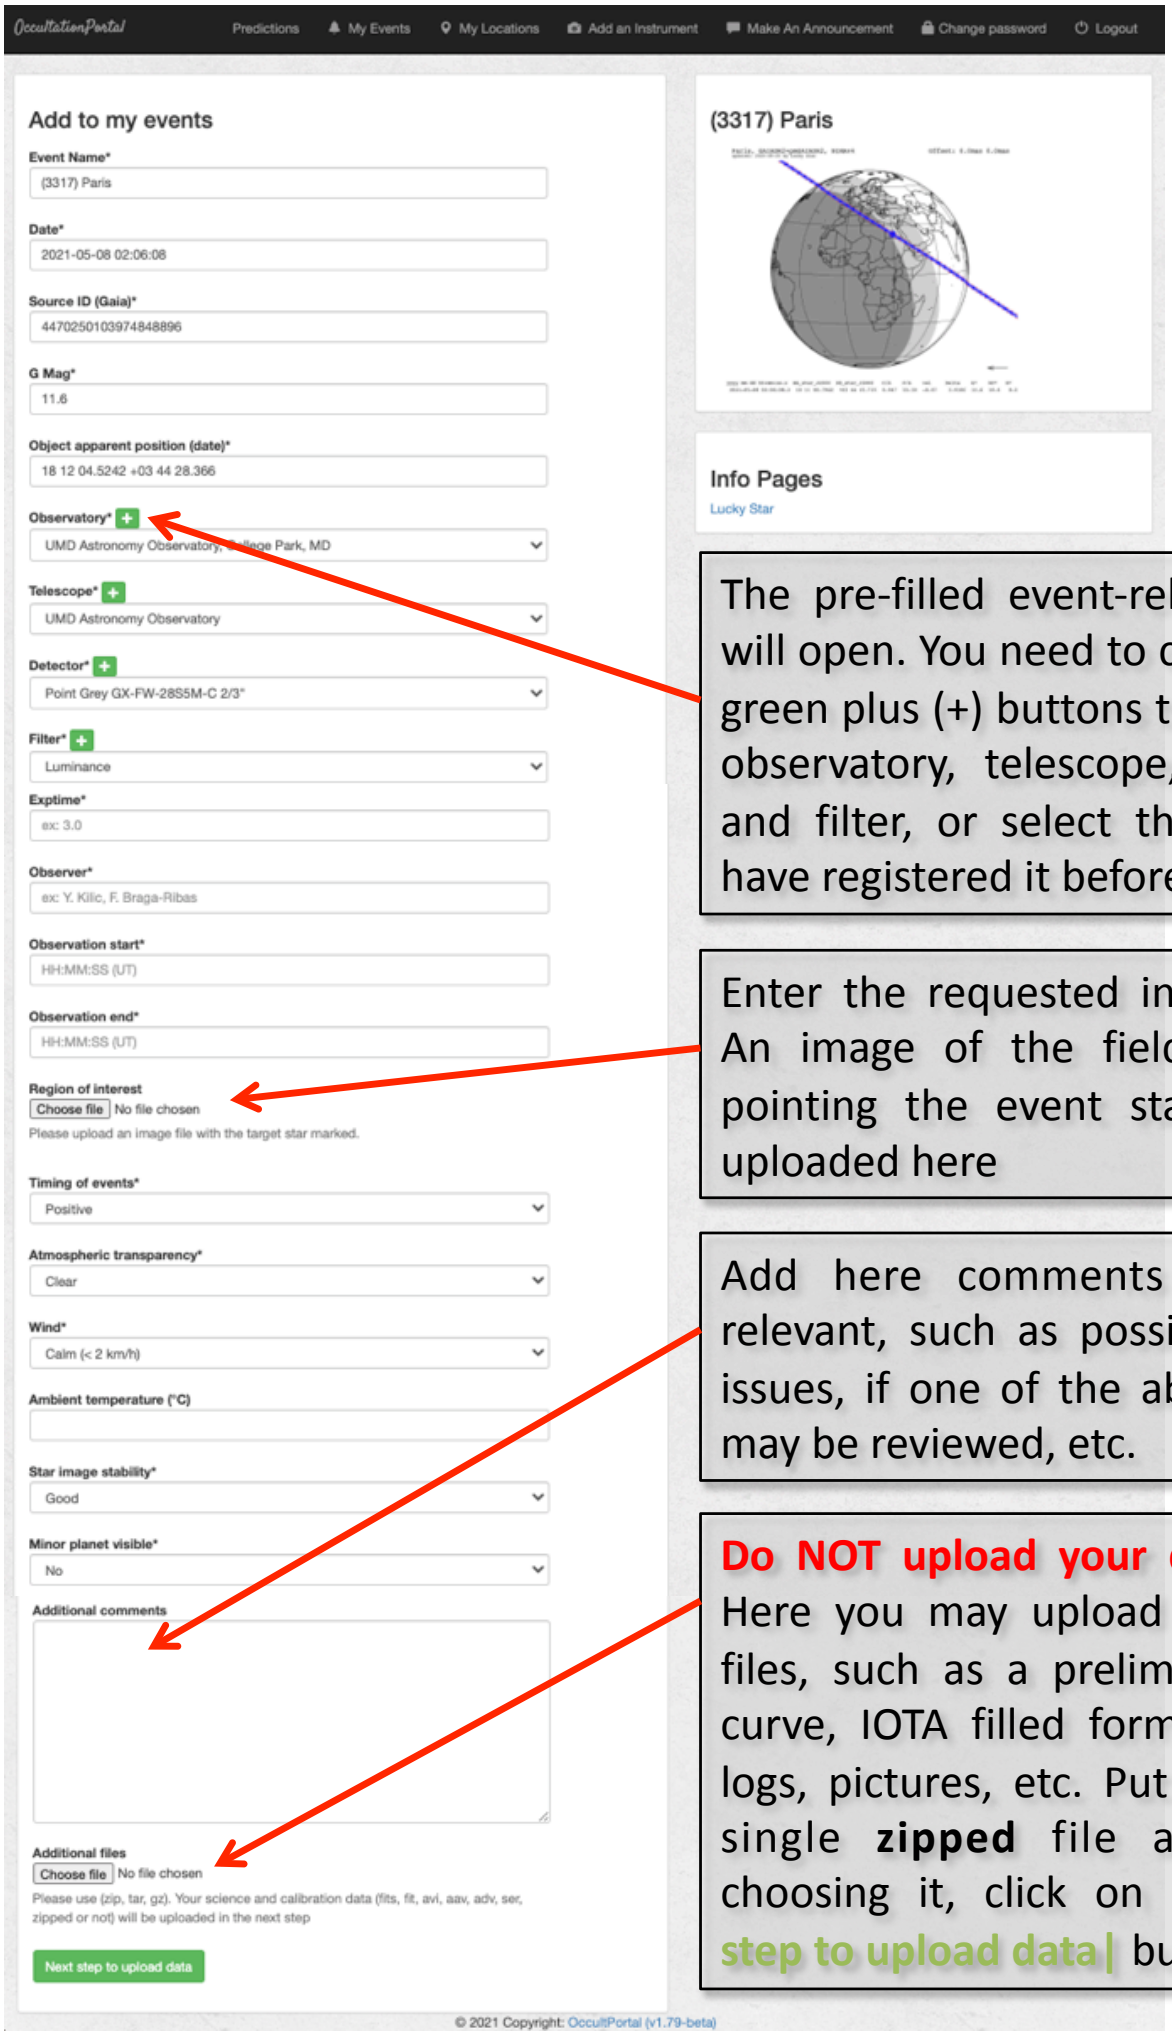
Go to the login page, enter your user name (not e-mail) and password:



Submitting your information about an event:



The home page displays a calendar. Click on the corresponding event.



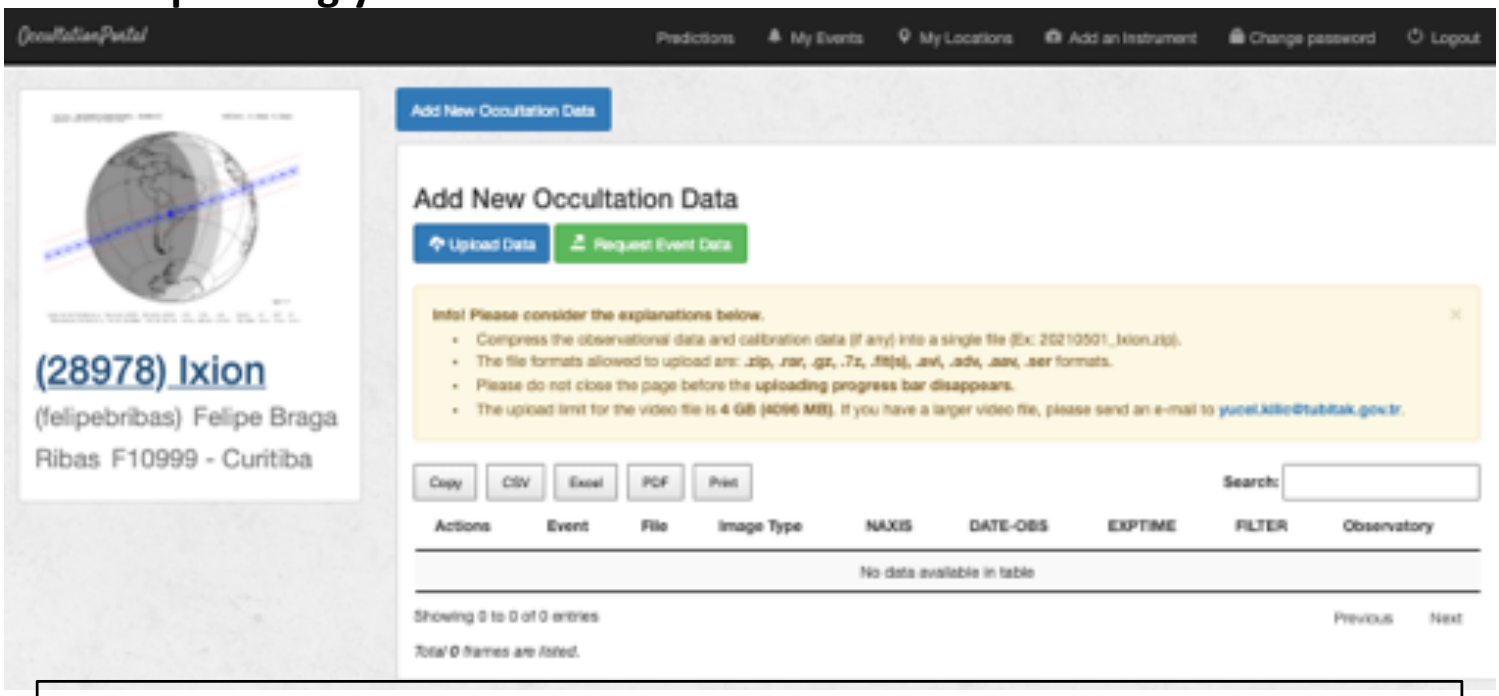
The pre-filled event-related form will open. You need to click on the green plus (+) buttons to add your observatory, telescope, detector, and filter, or select them if you have registered it before.

Enter the requested information. An image of the field of view, pointing the event star, can be uploaded here

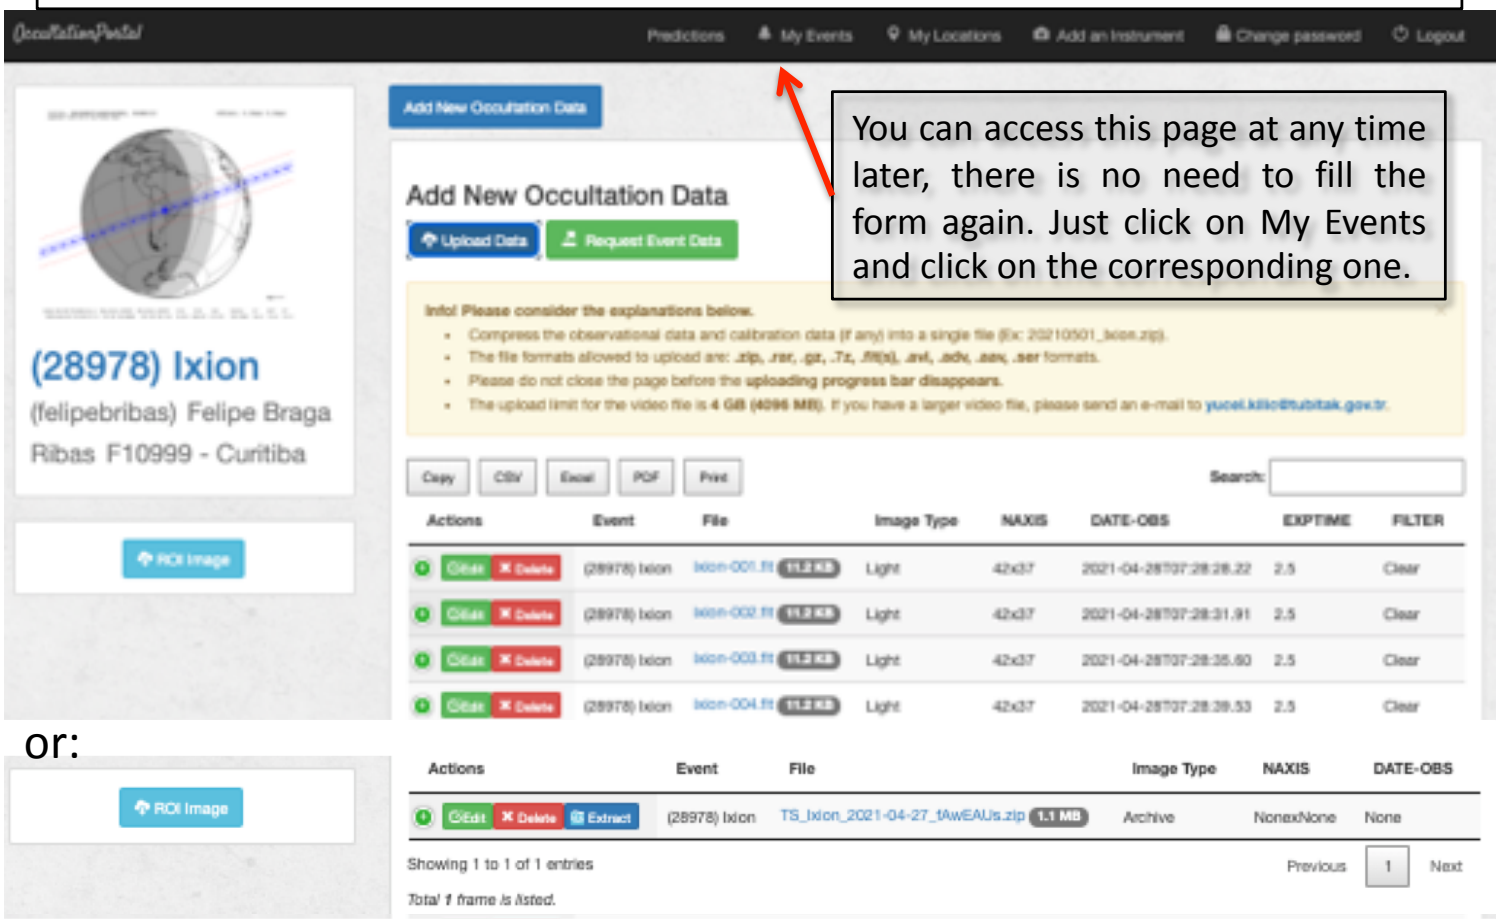
Add here comments you feel relevant, such as possible timing issues, if one of the above fields may be reviewed, etc.

Do NOT upload your data here. Here you may upload additional files, such as a preliminary light curve, IOTA filled form, D4 time logs, pictures, etc. Put it all in a single **zipped** file and, after choosing it, click on the |Next step to upload data| button.

Uploading your data:



After filling the event form and clicking on the green button, you will be directed to this page. Here you can click on the blue button **|Upload Data|** and send your event images, be **it fit(s), avi, adv, aav or ser.** You can also compress it with **zip, rar, gz or 7z** and upload the compressed file. When the upload is finished the page will display the uploaded file:



or:
